

West Suffolk Hospital

As Health Secretary I was delighted to announce last month that West Suffolk Hospital is to receive Government funding to start plans for a new hospital as part of our £13 billion plans for 40 new hospitals over the next decade.

Brandon Day Centre Saved

Opened in 1998, the Centre supports vulnerable people through respite care. When it was threatened with closure we mobilised the collective action of the District, County Councils & Brandon Community Action and saved the Centre.

The Haverhill Apprentices

I am a regular supporter of the One Haverhill Apprenticeship Awards. It is a perfect showcase of all the fantastic work going on in Haverhill – both among our young apprentices and local employers who support them in their careers.

More West Suffolk Police

Tackling crime is a top priority. I am delighted that Suffolk is getting an extra 54 police officers, as part of our extra government investment in 20,000 police officers across the country.

Better Broadband

I am passionate about digital connectivity and was delighted that, with funding from the Conservative District Council, Newmarket has become "a hub", providing unlimited public access wifi and 95% of Suffolk homes now have decent broadband.

Mildenhall's new Hub

It was a honour to start the building work on the Mildenhall Hub which will include a bigger school, swimming pool & health centre, children's centre, library, JobCentre, Citizen's Advice Bureau, police station & council offices in Mildenhall.

Out & About

our plan for West Suffolk

1

Improving Education

We're delivering a new building for Mildenhall College Academy. We've increased funding in our schools backing rigour and good teaching.

2

Better Roads

We've worked for new trains & upgrades to local stations, improved Fiveways roundabout with new traffic lights and won the campaign to get the A1307 included in the next Major Roads upgrade.

3

Our local NHS

Our Plan has backed expansion of the "Outstanding" rated West Suffolk Hospital including a new A&E Department. I'm campaigning for a new Haverhill Health Hub and an expansion to Newmarket Community Hospital and I have backed West Suffolk Hospital, including upgrading the A&E Department, and new plans for a whole new hospital.

4

Growing West Suffolk's Economy

We've achieved the delivery of 95% coverage of Superfast broadband in West Suffolk, secured £6.2m investment to Haverhill Research Park, championed the expansion of the apprenticeship programme which has seen 925 apprenticeships started locally in the past 8 years.

5

Strengthening Our Community

I've backed the construction of the Mildenhall Hub, including a new swimming pool and library. With the Council I'm delivering on the commitment to bring a cinema to Newmarket and will keep campaigning until it is opened. In Brandon we saved the Day Centre from closure and throughout West Suffolk we're delivering an increase in police numbers.

6

The Future's Bright

In West Suffolk the combined forces of the Conservative controlled District and County Councils and your Conservative MP, who is at the heart of government, are delivering for local people.

We have campaigned for, and achieved, a large slice of the national investment in our local economy, health services, schools and rail and road infrastructure, helping improve opportunities for all.

Dear Resident

As your MP for 9 years and now your Conservative candidate, I care deeply about securing improvements here in West Suffolk. Education is incredibly important – I'm thrilled about securing the new building for Mildenhall College Academy and securing increased funding for all our schools. The economy locally has benefitted from a £6.2m investment to the Haverhill Research Park and 95% coverage of superfast broadband.

Local transport is being transformed with the upgrades to Newmarket station and work on the A1307. Our community has benefitted with more police in West Suffolk and the new Mildenhall Hub, a thousand new apprentices and a proposed new West Suffolk Hospital.

There is still so much more to do – if re-elected I will work with the council to get a cinema for Newmarket and a health hub in Haverhill.

I love working for improvements locally. Please support me in my bid to carry on working hard for the people of West Suffolk.

Matt

Working for you!

It has been an honour to serve you as your MP both in Parliament and here in West Suffolk. There are so many great things happening locally and this is a snap-shot of the support it's been a privilege to provide.

New world-class train carriages are being rolled out by Greater Anglia on the Cambridge to Ipswich line, calling at Newmarket and Kentford. These environmentally-friendly carriages will bring more comfortable travel for local people.

Another campaign promise delivered, helping commuters and the environment at the same time.

Matt with Amy Starkey and James Steward welcoming the upgrade of Newmarket Station and the new trains.

I regularly chair the A1307 strategy board, seeking to improve road links between Haverhill and Cambridge. This group has helped the A1307 become recognised as a major road.

This allows the member councils to bid for funding from a £3.5 billion pot allocated to improve the nation's transport links.

Matt chairing the A1307 Steering Group to improve transport links between Haverhill and Cambridge.

Rubbish along the roadsides has no place in a beautiful county like Suffolk. I am campaigning for our roadsides to be free of litter that is tossed from cars. The council has already allocated funds to a programme for educating young male drivers that throw litter from cars which is a serious anti-social behaviour.

I regularly go volunteering with local rubbish-collecting groups. We need to clean up the litter that already exists to ensure that no more is added to it.

Matt joined a monthly litter picking group in Newmarket to keep West Suffolk tidy.

When I was Minister of State for Digital I took the Digital Economy Act through Parliament. The Act guarantees everyone a minimum broadband speed of 10Mbps. Internet service providers will be required to provide compensation to customers if service requirements are not met.

We've now achieved 95% superfast coverage in West Suffolk, boosting our local economy. If your broadband is too slow, get in touch.

Bringing Superfast Broadband to our rural communities with County Councillor Jane Storey and District Councillor Susan Glossop.

West Suffolk is a large and predominantly rural community and I've been supporting our village community centres as great places for local people to come together and get active regularly.

Regular activity and community engagement are among the best ways to promote physical and mental well-being.

Supporting our rural communities and keeping active as the best way to maintain mental and physical health
